The armoured transport service shall be under contract with the Refinery on substantially the terms and conditions set forth in Schedule “C”.

2.3 In the event of the loss of a shipment prior to sampling by the Refinery, the value of such loss shall be based on the weight and assays provided by the Customer to the Refinery in the commercial invoice included with the shipment. If the loss occurs after the Refinery
has weighed the Material upon arrival, the average of the Customer’s weight and Refinery’s weight shall be used to calculate the value of such loss.

2.4 In the event of the loss of a shipment after sampling by the Refinery, the value of such loss shall be based on the average of the assays conducted by the Customer and the Refinery.

2.5 Each Shipment will have full and complete documentation to permit importation into the United States, including but not limited to a commercial invoice and a detailed bar list.

2.6 The commercial invoice shall include the following information with respect to the shipment: (a) the number of dore bars; (b) the weight of each dore bar and of the total shipment; and (c) the provisional assay for each dore bar and the total gold and silver content of the Material contained in the shipment.

Upon request, the Refinery shall provide the Customer with evidence satisfactory to the Customer that adequate insurance coverage is in place, including having the Customer named as loss payee on the Refinery’s insurance policy. Such insurance coverage shall be maintained and in good standing for the term of this letter agreement.

3.2 It is the sole obligation and responsibility of the Customer to properly denote the insurable value of the Material on both the pro forma invoice and transportation airway bill so that there is proper insurance coverage for each shipment of Material.

4. RECOVERABLE METALS – CHARGES

4.1 Treatment Charges: (in USD per troy ounce received):
The Refinery shall provide the Customer with a list of holidays and Refinery closed dates for the remainder of 2016 on the date of signing this letter agreement and, thereafter, on the first business day of each calendar year of this letter agreement. In the event the Refinery shall require additional closed dates which are not known to the Refinery on the date of signing this letter agreement or the first business day of each calendar year of this letter agreement, the Refinery shall provide the Customer with a minimum of 30 days’ prior written notice of any such additional Refinery closed date.

A minimum of two (2) business days notice shall be provided by the Customer to the Refinery of the appointment of a Customer’s representative. Should delay(s) occur as a result of the Customer or the Customer’s representative's inability to attend the weighing and sampling, settlement and interest charges will be adjusted accordingly.

5.2 **Weighing**

Upon arrival of the Material at the Refinery’s premises, visual inspection of the seals will take place and the gross weight of the Material and packing will be determined and compared with the gross weight advised by the Customer. Any difference in excess of between the gross weight as stated in the commercial invoice and the gross weight determined by the Refinery, or the detection of damaged packaging, will be reported to the Customer or its representative immediately and in any event, within one business day.

If a representative is not present, the Material will be placed in a secure vault pending arrival of the representative, or the Customer’s written instructions to proceed with the weighing and sampling, in the absence of the representative.
The net weight of the Material shall be determined by removing the Material from the packing and weighing bars on an electronic balance, in grams and converted, reported in both grams and ounces Troy. The Refinery shall ensure that the weight scale is calibrated and operable.

In the case of a difference greater than [redacted] of the net weight combination or “lot” of Dore bars between the net weight of such Dore bar as set forth in the commercial invoice and as determined by the Refinery, the Dore bar will be held in a secure vault pending advice from the Customer to proceed or otherwise in writing.
